Small wastewater treatment plants

We manufacture small wastewater treatment plant installation kits for single and multi-family homes, small commercial operations or small group solutions up to 50 PE (7.5 m³/day). This includes

- ↙ **AQUAMAX®** BASIC 1–16 PE (up to 2.4 m³/day) and CLASSIC 17–50 PE (up to 7.5 m³/day) with submerged aerator
- ↙ **PUROO®** 1–16 PE (up to 2.4 m³/day) with compressor aeration
- ↙ **MAXIPUR** 1–32 PE (up to 4.8 m³/day) in the biofilm process
- ↙ **BUBBLER/BUBBLER PLUS** 1–16 PE (up to 2.4 m³/day) with compressor aeration

The ATB modular system

In addition to pre-configured systems, the **ATB modular system** offers you well over 1,000 different configuration options.

In addition, the **ATB modular system PLUS+** offers the possibility of perfect cleaning performance through the expansion of our AQUAMAX® and PUROO® systems with:

UV-hygienization

Safe phosphate removal

IOT monitoring

ATBSHOP

Accessories and spare parts

We provide interesting offers and a large selection of products for all aspects of wastewater treatment technology, water and wastewater treatment.

On over 180 pages in our **SHOP catalog** or in our **online shop**, you will find everything you need for the operation and maintenance of a wastewater treatment plant.

Look through our popular categories such as pumps, compressors, submersible aerators, maintenance, laboratory, magnetic valves, and much more and let yourself be inspired for your work at the wastewater treatment plant.

The ATBSHOP is available by phone, e-mail, fax and online around the clock and is characterised by the following qualities:

- ✓ Fast delivery time
- ✓ Large variety of products
- ✓ Attractive prices
- ✓ Friendly assistance
- ✓ Fair and fast warranty processing

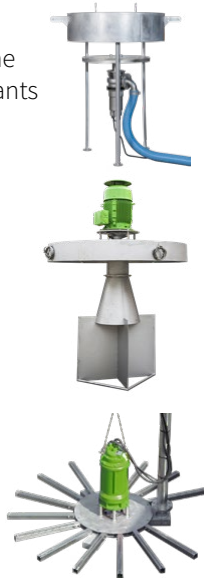

Professional components and solutions

Equipment

Our high-quality components are available in numerous types and designs and cover the entire spectrum of process engineering variants in large-scale wastewater treatment:

- ♣ Surface aerators
- ♣ Submersible aerators
- ♣ Mixers and combined units
- ♣ Decanters
- ♣ Mechanical pre-treatment
- ♣ Sludge dewatering
- ♣ Hygienization

Solutions

With the AQUAMAX® PRO we offer you professional solutions for the treatment of your waste water. The main areas of application are:

Hotels, gastronomy, commercial enterprises, food industry, tourism and municipal applications.

♣ **AQUAMAX® PRO G 1–50 PE**
(7.5 m³/day) submerged aerator
or compressor aeration

♣ **AQUAMAX® PRO XL 50–1,000 PE**
(150 m³/day) surface aerator
or compressor aeration

♣ **AQUAMAX® PRO XXL**
1,000–10,000 PE (1,500 m³/day)
with surface aerator
